

# Headline Fungicide Use in Soybeans

## Soybean diseases controlled or suppressed by Headline

### **Controlled:**

- Alternaria leaf spot
- Anthracnose
- Asian soybean rust
- Brown spot
- Cercospora blight
- Frogeye leaf spot
- Pod & Stem blight
- Rhizoctonia aerial blight

### **Suppression only:**

- Southern blight

## Management Details

**Rate:** Headline @ 6 oz./A.

- Late season foliar disease control.
- Asian rust preventative control.
- Stress reduction and growth efficiency.

### **Adjuvants:**

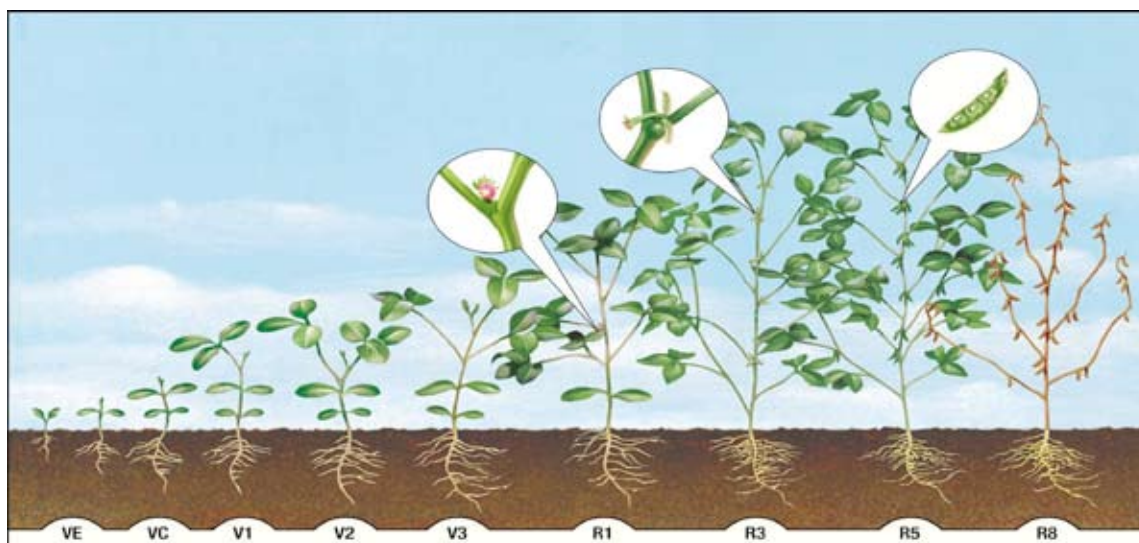

- NIS @ 1 pt./100 gallons (ground).
- COC @ 1 pt./A (aerial application).

### **Application Timing:**

- R3 (late R2 – early R4).
- Or prior to disease onset.

### **Coverage:**

- Ground: 20 GPA - medium to fine droplets.
- Air: 2-5 GPA

**R1=Beginning Flower**

**R2=Full Flower**

**R3=Beginning Pod**

**R4=Full Pod**

**R5=Beginning Seed**
