**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.00; non-GMO = \$3.00

**Test Comments:** *This was the first corn plot we planted as area spring conditons were excellent this year. In early September, we noticed Goss's Wilt in the plot. At harvest, Goss infected plants had lost most and were visually different than the rest of the plot. With good growing conditons this year, the plot had nice yield and consistent results. The ultra early test lodging reflects root lodged goosenecked stalks.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
