TEST COMMENTS: This test plot was located on the upper portion of a gradual slope. Drainage was equally distributed throughout the plot. There was minimal lodging throughout the test, with the exception of a few taller varieties. Yield levels were very good and consistent across all replications. Local yields were in line with the plot averages.

† See last page for abbreviation descriptions. Results in bold are significantly above test average by LSD (0.10). ns = column values not significantly different.
