**Test Comments:** *This field had good stalk health and was standing well at harvest. Strong yields and plot results made the early-season test stand out. We harvested in 20 degree weather and we had some head loss as corn ears hit the stripper plates. Wet fall weather has slow harvest and we even saw large fields of unharvested soybeans close by.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
