Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.00; non-GMO = \$3.00

Test Comments: *Timely planting and good soil conditions led to good emergence and a stress-free start. Grain drying was slow due to limited late-season heat. Grain moistures are finally in the 18-19% range. Some stalk lodging occurred on harvest day due to 50 mph wind gusts reported in the area. Planting this on lower ground that held moisture during the June and July dry weather gave terrific yields.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
