**Test Comments:** *Good seedling emergence and May weather was favorable. In the six week period from the middle of June to the end of July not much rain fell, making yield expectations wane. Weed control was strong all season. The plot was even and healthy looking for harvest. Strong yields despite the mid-summer stress and good plot data quality.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
