**TEST COMMENTS:** *We planted this test in early May, a day or two after Jeff, our host grower, planted the field surrounding it. Planting conditions were superb, and the test looked great throughout the growing season. Rainfall was timely providing an estimated total 13% above the ten year average. There were many tall varieties in this test. Jeff said that he was seeing between 45-60 bu/acre in area fields.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
