Test Comments: *Wet conditions delayed planting the plot until mid-May, same day as Pat, Jeff, and John planted the surrounding field. Growing season rainfall was slightly above average with a large amount right after planting. There was a dry period from July 21 to Aug. 21 with only 1 inch of rainfall. Very wet at harvest with water filling ditches. Area farmers loaded trucks on the gravel roads instead of in fields.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
