**Test Comments:** *The corn surrounding this plot had been harvested about a month before we harvested and it was still standing well. Stalks of some hybrids were very brittle and during harvest. In many instances, the upper stalk portion, which included the ear, broke off and dropped onto the combine head. Grain moistures were around 20 percent. Good weed control and yield results.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
