New test site, no yield history

Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.00; non-GMO = \$3.00

Test Comments: We had good stand establishment at this strip-till site. Plenty of rainfall was received all season and being a well drained site, very good yields were produced. Some western winds this fall caused some stalk lodging that resulted in some some variable yields. We harvested in a light fluffy snow that didn't cause any issues. Good weed control all season.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
