TEST COMMENTS: *The plot was planted the same day as Wayne, Curt, and Dave planted the surrounding field. The plot experienced an August dry spell that took away top end yields. Curt commented that it would have been one amazing soybean crop in this area if they had received some much needed rain during pod fill. Area yields have been in the 40 - 50 BPA range. At harvest, plants were short but very bushy.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
