**TEST COMMENTS:** *This was the first soybean plot we planted this year. Tim, our plot host, applied preemergence herbicide right before we planted and weed control was excellent this year. Plants were moderately tall at harvest with very little lodging. Plants of many varieties had multiple pods that contained four beans per pod. This area had rains precisely when needed, making for great yields.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
